59 THE MARVIN STORY

THE INFINITY EXPERIENCE

Built for life[®]

“

We harness the strength of
Ultrex® fiberglass to create
beautiful windows and doors
that are *Built for life*®.

We back your purchase with an incredible warranty for ultimate peace of mind. Because some decisions — like replacing your windows — should only be made once.”

DAN MARVIN, PRESIDENT

Your dedicated replacement experts

With expertise specific to your area, an Infinity consultant will help you navigate local codes and regulations while walking you through every step of your replacement project.

AN INFINITY CONSULTANT WILL HELP YOU:

ASSESS YOUR CURRENT WINDOWS AND PATIO DOORS

Your design consultant will evaluate your current windows for moisture issues, water damage, rot, or structural concerns. They'll also note any energy efficiency or functional concerns, like sticking or failure to stay open.

SELECT YOUR PREFERRED OPTIONS

From window styles and profiles to performance glass and hardware finishes, your consultant will walk you through all the options to transform the way your windows look and operate.

TAKE MEASUREMENTS

A technician will visit your home to measure openings, accounting for variances or imperfections. Measurements are sent to the factory where your windows and patio doors will be built to your specifications.

DECIDE ON AN INSTALLATION METHOD

Depending on the condition of your existing windows and your dream design, they will determine if it's a complete redesign with a full-frame replacement or a simpler one-for-one insert replacement (*see page 57 for more details*).

UNDERSTAND REPLACEMENT COSTS

There is no one-size-fits-all when it comes to window replacement. Your consultant will help you price out your replacement project and understand how to work within your budget.

PLAN AN INSTALLATION TIMELINE

Depending on the size and scope of your project, installation could take a few hours to days. Your consultant will give you a detailed timing estimate when you're ready to order your Infinity products.

"We actually ended up with bigger windows! Before, our windows were very chopped up, we lost a lot of viewing in the middle. Now we have a much bigger view."

MELISSA T, HOMEOWNER

INSPECTION: DETERMINE INSTALLATION METHOD

INFINITY INSTALLATION EXPERTS WILL:

PREPARE AND PROTECT YOUR HOME

You may be asked to clear the work areas by removing curtains, blinds, and nearby furniture. To further protect your home, the installation team will cover floors and nearby furniture with protective materials.

ENSURE A SEAMLESS INSTALLATION

The team will remove old windows and prepare the openings according to the chosen installation method. Once the new windows are inserted, secured, and fastened, your installation expert will apply the required insulation and flashing. Finally, any necessary trim, casing, and hardware will be added for a finished look.

REMOVE AND DISPOSE OF YOUR OLD WINDOWS

Infinity partners will handle the removal and disposal of old windows and patio doors. Following local regulations for materials like glass, metal, and wood ensures an environmentally responsible process.

PERFORM A FINAL WALK-THROUGH

Once installation is complete and work areas are clean, your consultant will typically perform a final walk-through. They will ensure everything is correctly finished, demonstrate the operation and maintenance of particular products, and address any outstanding questions.

ULTREX® ADVANTAGE

STANDS UP TO THE PRESSURE

Ultrex is 8x stronger than vinyl and has a low thermal expansion rate. It is heat resistant, non-corrosive, and has low conductivity. The strength of Ultrex translates into exceptional stability, long-term ease of operation, low maintenance, and superior performance.

A FINISH THAT LASTS

Infinity's proprietary acrylic finish is 3x thicker than the competition. No sanding, scraping, or painting required. Our finish resists scratching and denting, and performs so well that we offer dark colors without fear of UV degradation or fading.

A FIT THAT NEVER QUILTS

Ultrex's low thermal expansion rate means that our windows and doors stay tight and true even after extreme temperature swings. By expanding and contracting at nearly the same minimal rate as glass, Infinity windows made with Ultrex are more resistant to leaks and seal failures.

AN INVESTMENT THAT PAYS

Ultrex's low thermal conductivity and superior performance combined with a selection of energy-efficient glass glazing options can help save money on your energy bills¹.

Enjoy superior comfort, broader views,
and greater peace of mind. For a lifetime.

Featuring an Infinity Outswing French Door in Stone White interior with White hardware

1. Replacing old windows with ENERGY STAR® certified windows lowers household energy bills by an average of up to 13% nationwide when replacing single-pane windows. Lower energy consumption also reduces greenhouse gas emissions from power plants and homes. https://www.energystar.gov/products/res_windows_doors_skylights

01

RAW FIBERGLASS STRANDS

We start with thin strands of strong glass cables and saturate them with specifically compounded resins.

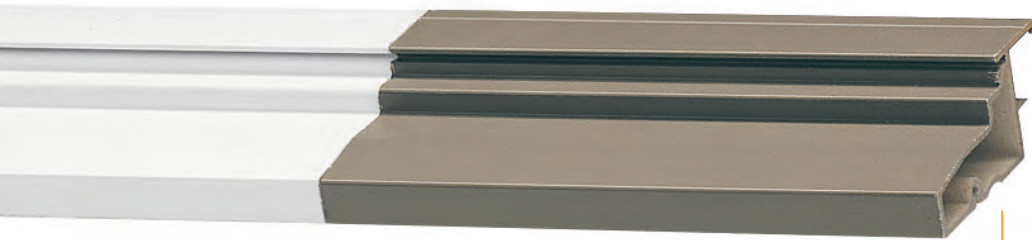

Strength, maximized

Built with our proprietary Ultrex® fiberglass, Infinity windows bring strength and confidence to your home.

02

PULTRUDED FIBERGLASS

We pull the strands through a heated die to form Ultrex and cut them with diamond-edge blades.

03

PROPRIETARY ACRYLIC FINISH

And we top Ultrex off with our proprietary acrylic finish that is smoother and 3x thicker than the competition.

ULTREX® STRENGTH

Infinitely enduring

8x

Ultrex is 8x stronger than vinyl.

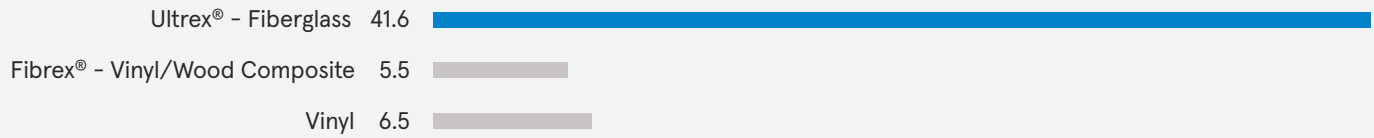

3x

Ultrex is 3x stronger than Fibrex®.

The strength of Ultrex means it won't bend or flex,
that's confidence Fibrex® and vinyl simply can't match

RESISTS BREAKING UNDER PRESSURE

Stress-tested to the point of failure and for extreme conditions so we can confidently stand behind our products.

PEAK STRESS (KSI) — ASTM D7137

ULTREX IS 8X STRONGER THAN VINYL

Ultrex offers superior bend and flex resistance to protect the integrity of your home.

FLEXURAL MODULUS (KSI) — ASTM D790

IMPACT RESISTANT

Ultrex fiberglass is built tough to take the hits — like wind, rain, hail, branches, and even a direct hit from a baseball.

MFE (IN *LBF) — ASTM D5628

WINDOWS

Double Hung, Single Hung, and Single Hung Round Top

Featuring Infinity Double Hung Windows
in Stone White interior with White hardware

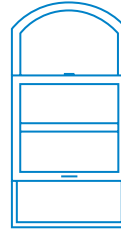

DOUBLE HUNG

A timeless window style, the Infinity Double Hung is updated for modern performance. Both the top and bottom sashes tilt in for easy cleaning. They also open and close, allowing cool air to come in through the bottom while the warm air leaves from the top.

SINGLE HUNG

The Infinity Single Hung offers the same great performance and classic style as the Infinity Double Hung, only with a fixed top sash.

SINGLE HUNG ROUND TOP

The arched top of the Infinity Single Hung Round Top adds character and beauty to your home, while providing the same superior performance of our traditional single hung window.¹

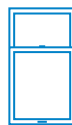

CLEANING MADE EASY

1. Unlock and raise the sash slightly.
2. Press the tilt release button and slide the lock lever over the button.
3. Tilt the sash into the room for easy cleaning without screen removal.²

3. Available with matching picture window. Ask about additional assembly options for your home.

Slider

Featuring an Infinity Slider Window with TriVue™ profile
in Ebony interior with Matte Black hardware

SLIDER

Open the Infinity Slider (also commonly referred to as a Glider) to enjoy a cool breeze and wide-open views without worrying about a window opening into your outdoor living space or landscaping. We've designed the Infinity Slider Window to seal tightly against water and wind, so you'll enjoy a breeze only when you want to.

CLEANING MADE EASY

Cleaning the Infinity Slider is easy with our tilt latch. Simply slide the sash open, operate the tilt latch, remove, clean, and reinsert.¹

WINDOWS

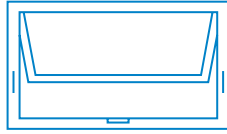

Casement and Awning

Featuring Infinity Casement Windows
in EverWood® interior finish with Satin Taupe hardware

CASEMENT

The Infinity Casement is a side-hinged window that extends from left or right. Smoothly crank the Infinity Casement out with our folding handle that tucks out of the way of most window treatments for a clean, finished look. Each Infinity Casement features two hinge options for easy cleaning or larger, unobstructed views.

AWNING

Awning windows are perfect for tight spaces or placed higher on a wall for additional privacy. The sash extends outward from the bottom so you can enjoy a fresh breeze with great ventilation.

CASEMENT HINGES

Select the standard Easy Wash® hinge to easily clean the window from inside your home. For even broader views, our optional Clear View® hinge offers an expanded viewing area by keeping the sash tight to the frame.¹

Bay and Bow

Featuring an Infinity Double Hung Bay Window with Picture unit in Stone White interior with White hardware

BAY

The Infinity Bay is built to capture light from three angles and can vary in size from big, sunlit areas to a small, cozy reading nook. Our bays are available in double hung and casement configurations.

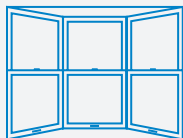

BOW

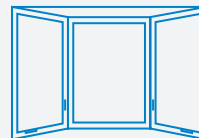

The Infinity Bow is built with a gentle curve to capture light from multiple angles and completely transform a room. Bow windows are available in casement configurations that open outward so you can enjoy natural light and a fresh breeze.

TriVue™

Infinity's new TriVue window profile features triple-pane glass with Low-E coating options that meet ENERGY STAR® requirements in all climate zones, delivering superior thermal performance for enhanced comfort in cold climates.

The TriVue window profile features a sleek, modern design. *See page 45 for details.*

SPECIALTY GLASS

DECORATIVE GLASS

Infinity's decorative glass and tint options, *shown on the right*, let you add light and style to your home while keeping your privacy intact.¹

STC/OITC GLASS

Sound Transmission Class and Outdoor-Indoor Transmission Class glass has varied pane thicknesses for sound dampening, ideal when noise is a concern.

TEMPERED GLASS

Tempered glass provides extra strength to prevent breakage, making it ideal for windows near the floor or in high-traffic areas.

LAMINATED GLASS

More durable than tempered glass, laminated glass is also known as impact resistant or safety glass due to its vinyl interlayer that tends to remain in place when cracked.

CALIFORNIA FIRE GLASS

California fire glass is available where fire safety codes require one pane to be tempered glass.²

GLAZING OPTIONS

LOW E1

An option for colder climates — especially those at elevations with direct sun exposure. A single layer of coating allows UV rays to warm your home while blocking heat loss.

LOW E2

Low E2 features two layers of coating that reflect heat back to the source. This glass performs year-round in moderate climates, retaining heat in the winter and keeping it out in summer.

LOW E3

With three layers of coating, Low E3 keeps solar heat at bay while letting visible sunlight into your home. A popular option for climates with intense sun exposure.

LOW ERS

Available in conjunction with Low E2 or Low E3, this additional layer of coating is added to the room side of the glass. Low ERS reflects heat back into the room for maximum year-round energy efficiency.

1. Obscure glass is the only decorative glass option available with the TriVue window profile.

2. Infinity windows are not fire-rated. Not available with the TriVue window profile.

TRADITIONAL PROFILE

TRIVUE™ PROFILE

TRADITIONAL PROFILE

DOUBLE-PANE GLASS

Infinity's standard glass option features two panes of glass. This energy-efficient design paired with climate-specific glazing options ensures comfort while meeting ENERGY STAR® requirements in select regions.

CLASSIC DESIGN

Our Traditional window profile, made with Ultrex® fiberglass, offers a curved bevel where the sash meets the glass for timeless appeal that complements any home style.

TRIVUE PROFILE¹

TRIPLE-PANE GLASS

Infinity's premium glass option features three panes of glass that enhance comfort in cold climates and offers glazing options that meet ENERGY STAR® requirements in all climate zones.

MODERN DESIGN

Our TriVue window profile, made with Ultrex fiberglass, offers a sleek design with contemporary aesthetics to complement a variety of home styles.

1. TriVue is not available for patio doors or single hung round top windows.

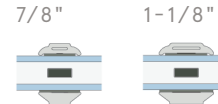

GRILLES AND DIVIDED LITES

Featuring an Infinity Casement and Picture Window
in Bronze exterior with standard rectangular SDLs

SIMULATED DIVIDED LITES

Our Simulated Divided Lites (SDLs) are built with Ultrex® fiberglass. Permanently adhered in our factory to the outside surfaces of the glass, SDLs have a spacer bar between the panes of glass for a traditional look.¹

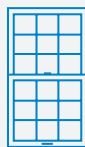

GRILLES BETWEEN THE GLASS

Located between the panes of insulating glass, our contoured Grilles Between the Glass (GBGs) combine easy cleaning with timeless design details.²

3. Custom patterns and additional style options available upon request.

SCREENS

Featuring an Infinity Double Hung Window
in Stone White exterior with Hi-Transparency screen

SCREEN MESH

Infinity offers durable aluminum-surround screens with 2 charcoal fiberglass mesh options. Screen frames are color matched to the window or patio door for a seamless look. To match our EverWood® interior finish, Infinity offers an EverWood-wrapped screen option for a seamless look that can be stained to match your interior trim.¹

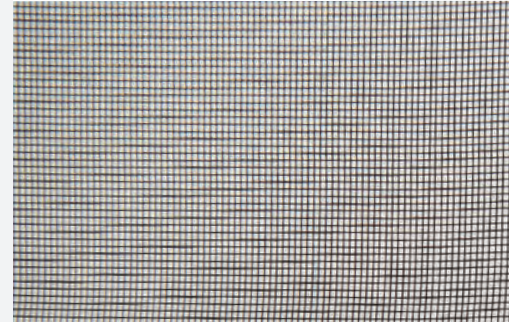

Infinity's screens ensure excellent airflow and insect protection. Enjoy the best of both worlds with screens that are as practical as they are beautiful.

BRIGHT VIEW

Our standard Bright View charcoal fiberglass mesh offers a clear view, effectively sheds water, and resists dirt. Enjoy unobstructed views and easy maintenance with this reliable screen option.

HI-TRANSPARENCY

Upgrade to our Hi-Transparency charcoal fiberglass mesh for even crisper, clearer views while retaining all the benefits of our standard screen. Enjoy enhanced visibility without compromising performance.

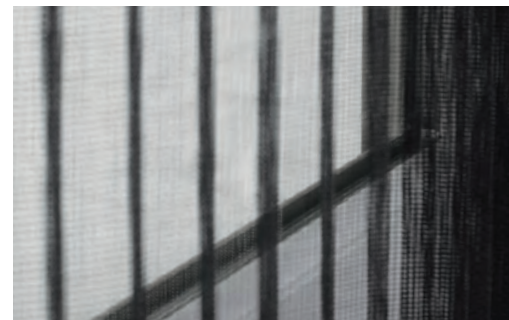

BRIGHT VIEW

HI-TRANSPARENCY

BI-FOLD DOOR PLEATED SCREEN

Infinity's Bi-Fold Door uses a pleated fabric screen that slides open and can be positioned as desired. Bi-parting and uni-directional options are available depending on your configuration. The screen folds tightly to the jamb when not in use for an uninterrupted view outside.

BI-FOLD DOOR PLEATED SCREEN

¹ EverWood is only available for casement and awning screens.

RAIL

The horizontal part of a window sash or door panel

INSERT REPLACEMENT

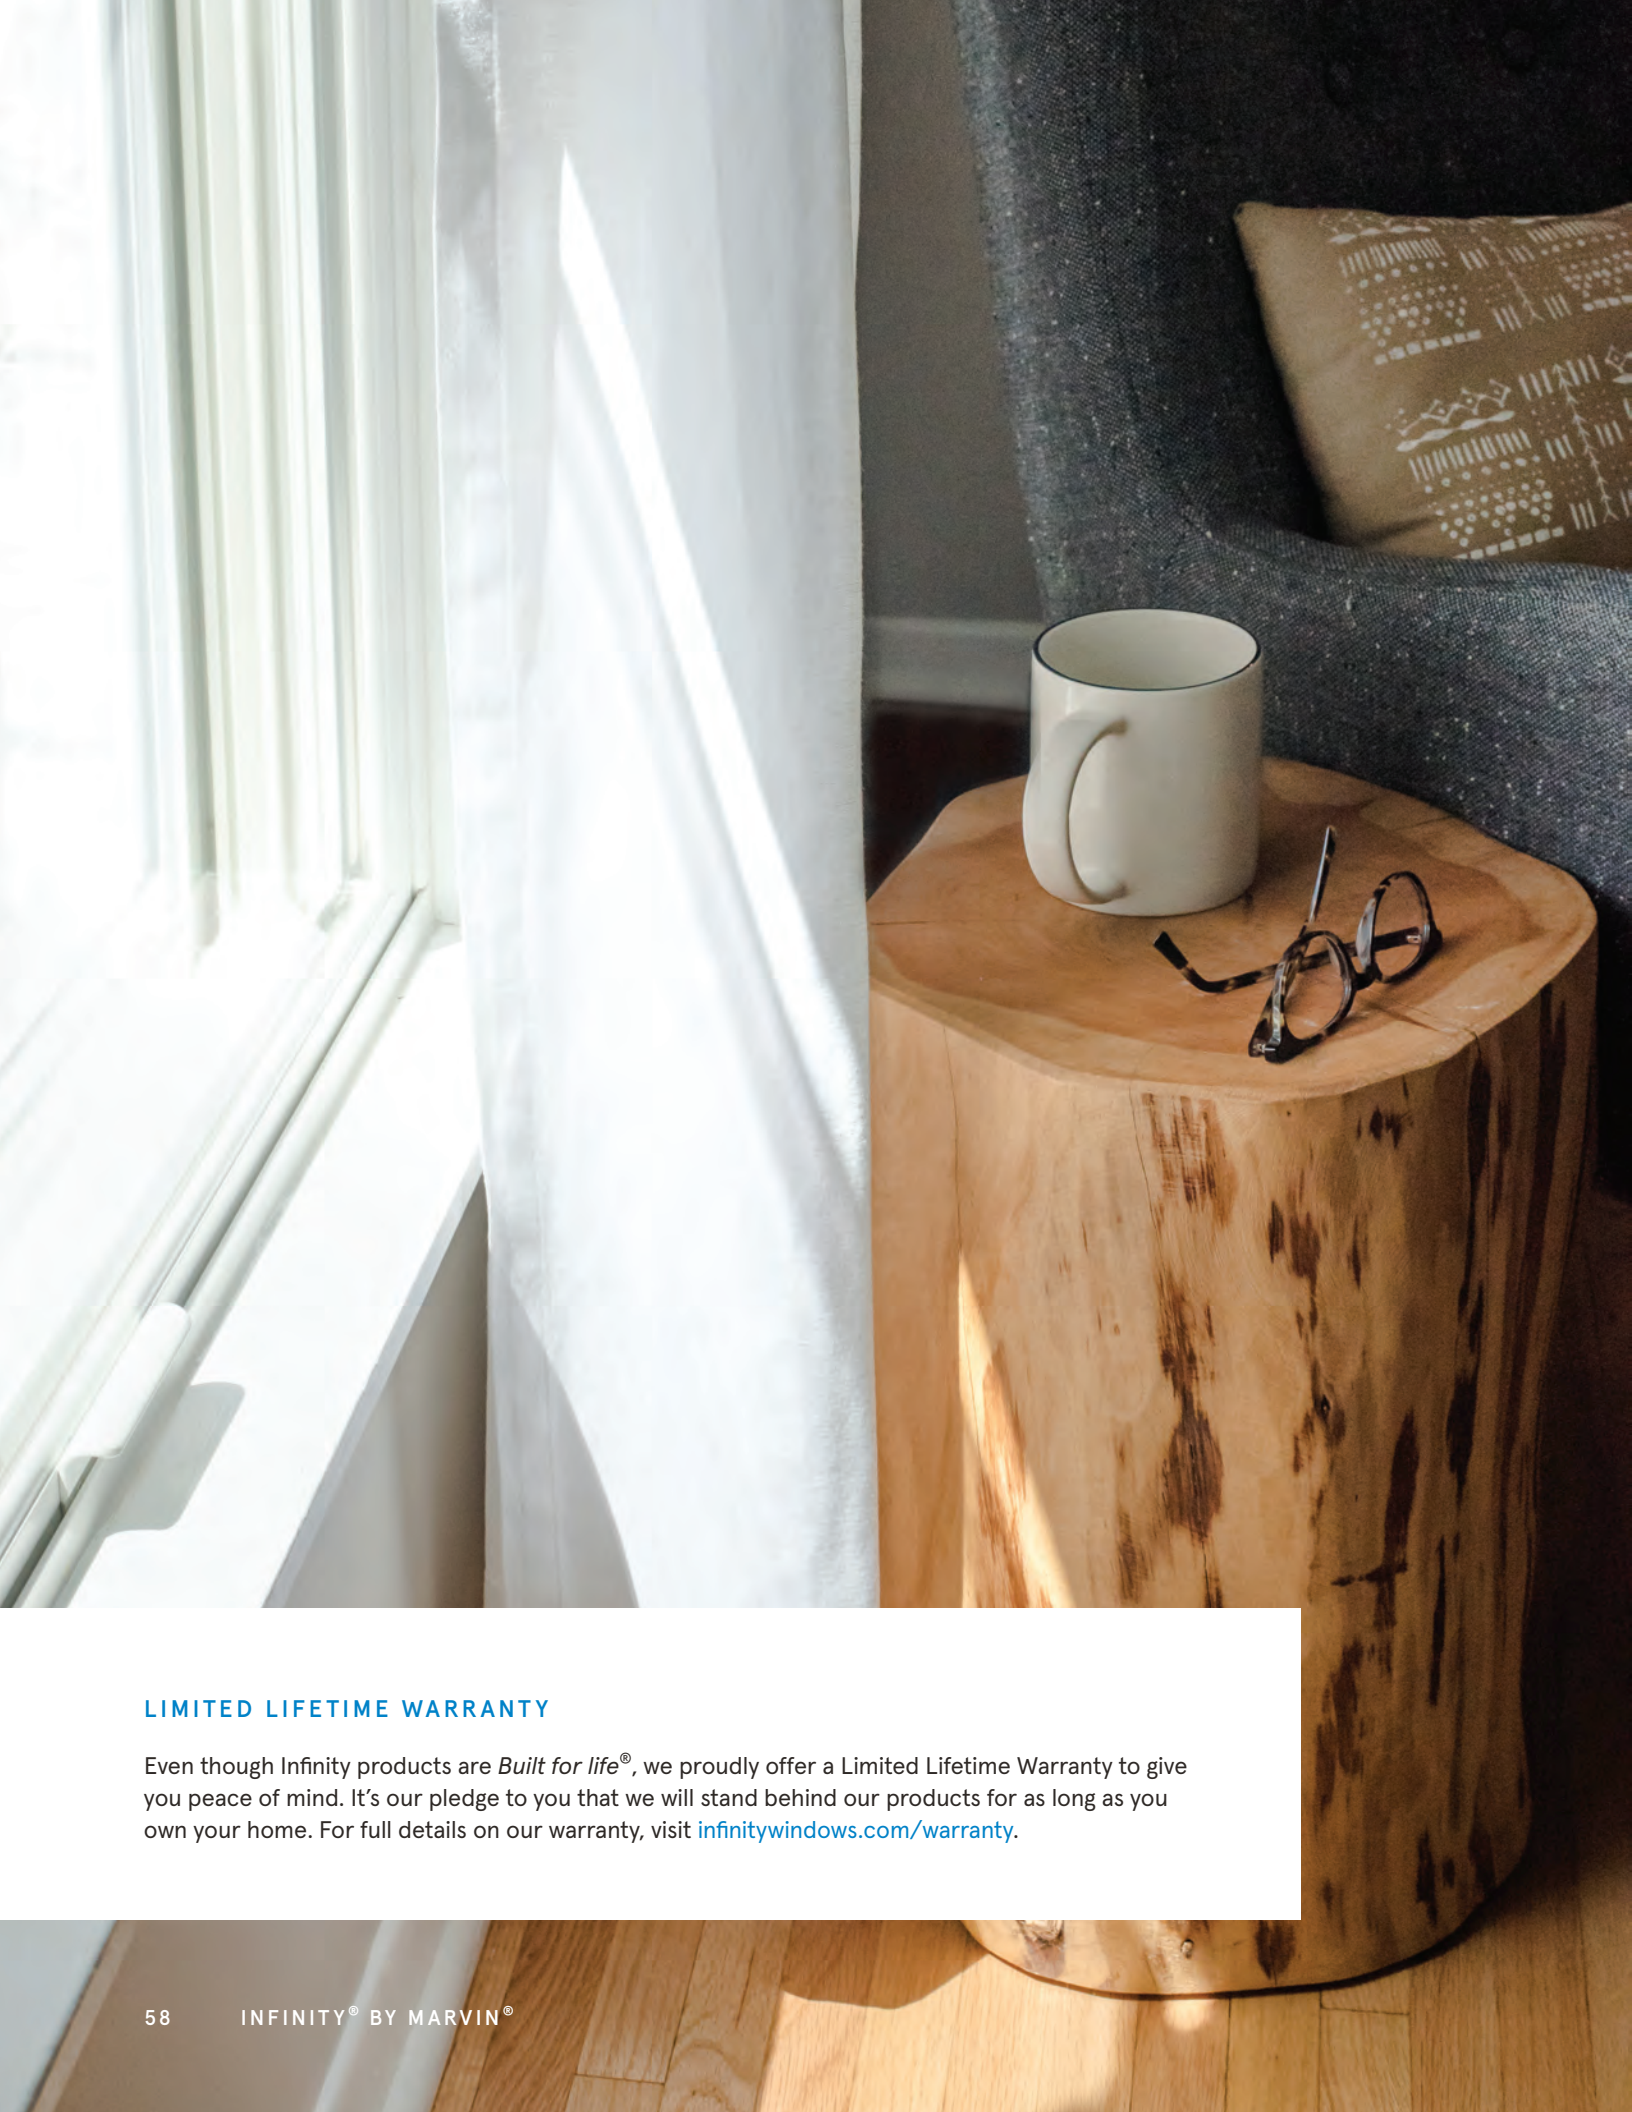

FULL-FRAME REPLACEMENT

INSERT REPLACEMENT

If your current window frames are in good condition and you want to maintain the size and style, this may be the right option for you. New windows are inserted directly into your existing frame for a more efficient, less disruptive installation. This method can minimize labor costs without compromising performance.

FULL-FRAME REPLACEMENT

For replacement windows, this approach is typically used if you want to completely transform your home with a new size or style. Your consultant may also recommend this method if water or structural damage are a concern. While a full-frame replacement has less impact on your exteriors than a new build, it does require removal and replacement of trim. All Infinity doors are installed with full-frame replacement.

LIMITED LIFETIME WARRANTY

Even though Infinity products are *Built for life*®, we proudly offer a Limited Lifetime Warranty to give you peace of mind. It's our pledge to you that we will stand behind our products for as long as you own your home. For full details on our warranty, visit infinitywindows.com/warranty.

The Marvin Story

Family-owned and led since 1912, Marvin has come to mean strength, quality, and doing the right thing for homeowners. Building upon this heritage, Infinity launched as the dedicated replacement window and patio door line in 2002.

Carrying the Marvin legacy forward while carving out a space in the replacement window industry, Infinity by Marvin is committed to the lifelong satisfaction of our customers. To deliver on this commitment, we innovate and push ourselves and our partners to improve our materials, designs, and services in a way that will allow us to transform homes for centuries to come.
